About Me

After working with coding for several years in a management role, I decided to expand my skill set by studying full-stack development at Rutgers University. Always in search of new challenges, I take initiative to research and acquire skills that allow me to thrive in dynamic, evolving roles. I strive to make a meaningful impact in my workplace and communities through my contributions.

SKILLS

Browser languages- HTML, CSS, JavaScript

Front End- React, Handlebars

Back End- MySql/Sequelize, MongoDB/Mongoose, GraphQL

Other- Node, Express for servers/API's, JQuery, Webpack

EDUCATION

Rutgers University - *Full Stack Web Development Certificate*

February 2024- August 2024

Studied numerous languages and commonly used web development tools, along with computer science and modern coding techniques

Projects

NomadNotes- <https://nomadnotes-3v1b.onrender.com/>

A website developed by a team of 5 that uses MongoDB and GraphQL to store data entered by users about trips.

Community Connect:

<https://github.com/Noah-Manno/community-connect>

A social media site developed by a team of 4 to connect local nonprofits (Uses SQL/servers)

Music Spotlight:

<https://github.com/MikeKruce/The-Music-Spotlight>

A website that retrieves lyrics on an inputted song by using API calls.
